PHAM HONG HIEU (HAVEN)

Supply Chain & Data Analyst | SQL · Python · Power BI · ERP

Taoyuan, Taiwan | havenpham63729@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Supply chain analyst with over two years of hands-on experience in supply planning, Oracle ERP inventory control, international freight forwarding and import/export documentation in Vietnam. Now completing a Global MBA at Yuan Ze University in Taiwan (GPA 4.00/4.00, ranked 1st of 28), where I combine this operations background with SQL, Python and Power BI to build end-to-end analyses of OTIF, supplier performance, customer retention and margin. Co-author of a paper on technology-convergence lifecycles accepted at the 2026 CSMOT Annual Conference.

EDUCATION

Global Master of Business Administration (Global MBA) **Feb 2025 – Present**
Yuan Ze University, College of Management Taoyuan, Taiwan

- GPA 4.00/4.00 (average 96.19, 32 credits) · Ranked 1st of 28 in Semester 2 (8th of 32 in Semester 1)
- Outstanding Dedication Award, Global Affairs Office (Jun 2026) · Master's scholarship (Feb 2025)
- Mandarin Intensive Program, Level 2 (Dec 2025)

Bachelor of Logistics and Supply Chain Management **Oct 2020 – Jul 2024**
Ho Chi Minh City University of Technology and Engineering (HCM-UTE) Ho Chi Minh City, Vietnam

- GPA 8.46/10, graduated with Distinction (125 credits) · Training score 90/100 (Excellent)
- Academic Encouragement Scholarship (Apr 2023) · Logistics Hub competition: ranked 14th of 63 teams (Mar 2023)

TECHNICAL SKILLS

Data Analysis: SQL (CTEs, window functions; HackerRank Advanced), Python (pandas, NumPy, SciPy, Plotly), DuckDB
BI & Reporting: Power BI (data modelling, DAX, drill-through), Excel, Excel and PowerPoint reports automated in Python
Statistics: χ^2 and permutation tests, growth-curve models, cohort, RFM, ABC/Pareto, market basket, holdout validation
ML & NLP: PyTorch, Hugging Face, sentence-transformers, few-shot text classification (SetFit, FastFit)
Supply Chain & ERP: Oracle ERP, SAP Business One, Odoo, supply planning, inventory standards, OTIF and supplier KPIs
Logistics & Trade: Sea/air forwarding, reefer cargo, C/O, SI, VGM, phyto, HS codes, Incoterms 2010/2020, L/C, T/T, D/P/D/A
Tools: Git, GitHub Actions, pytest, Jupyter, Google Colab, VS Code, Microsoft Office
Languages: Vietnamese (native), English (TOEIC 840/990, professional working), Mandarin (TOCFL Level 2, A2)

WORK EXPERIENCE

Supply Chain Planner **Oct 2024 – Apr 2025**
Hoa Sen Group (steel and building materials) Ho Chi Minh City, Vietnam

- Placed purchase orders and followed up suppliers of domestic and imported goods to keep deliveries on schedule.
- Managed inventory and transactions in Oracle ERP; coordinated stock transfers between factories and warehouses.
- Set inventory standards for warehouses and distribution points across the nationwide network.
- Developed import and export plans for goods in line with stock levels and demand.
- Built operational reports that gave clear, transparent visibility of orders and stock.
- Resolved complaints and other issues raised by customers and suppliers.

Reference: *Mr Dat, Head of Supply Chain Department*

Sales Logistics Staff **Jul 2023 – Aug 2024**
Kodai Sangyo (Vietnam) Co., Ltd. · freight forwarder, refrigerated cargo Ho Chi Minh City, Vietnam

- Prospected new accounts through e-mail campaigns, cold calls and client meetings to meet monthly sales targets.
- Updated air and ocean freight rates from carriers and overseas agents; issued weekly and monthly quotations.
- Planned refrigerated shipments around vessel schedules and customer requests: domestic trucking, customs declaration, C/O, phytosanitary certificates and cut-off times.
- Worked with documentation, operations, customer service and coordination teams to run shipments end to end.
- Drafted service contracts, negotiated terms and payment, and collected receivables in line with the agreed credit terms.

Reference: *Mr Benny (Kuo Che Wei), Director*

Export & Import Trainee **Jan 2023 – Jul 2023**
Viet Logistics Co. · freight forwarder, dry cargo Ho Chi Minh City, Vietnam

- Prepared customs document sets (contract, invoice, packing list, C/O, SI, VGM) and classified goods by HS code.
- Checked rates with carriers and agents, booked space, priced quotations and scheduled stuffing per booking.
- Applied Incoterms 2010/2020, calculated local charges and surcharges, and handled L/C, T/T, D/P, D/A payments.

- Coordinated documentation and operations teams to monitor shipments; introduced services to new customers.

Reference: *Ms Ngoc Xuan, Manager*

ERP SYSTEMS

SAP Business One & Odoo **Hands-on practice**

- Production: managed Standard, Special and Disassembly production orders with backflush and manual issue methods.
- MRP: planned material requirements from sales orders, forecasts and stock levels.
- Inventory: lot/serial-tracked stock, goods receipts and issues, expiry dates, preferred vendors and units of measure.
- Warehouse: multi-location set-up and transfers; purchase orders and transfer requests from demand and stock.

PROJECTS

F&B Supply Chain Analytics (NordFresh Distribution) | *Python, Power BI, DAX* GitHub

- Cleaned 2,200 order lines and 5,040 stock snapshots (8 suppliers, 5 DCs) into a star schema (2 facts, 6 dims).
- Built supplier and DC scorecards, a 3-page Power BI dashboard (37 DAX measures) and a 17-slide executive deck.
- Measured strict OTIF at 89.4% against a 95% target: two suppliers handled 26% of orders but caused 55% of late orders, and $64.0K (10.6%) of revenue arrived late or short; supplier corrective plans target about +4 pp OTIF.

Transport OTIF Root-Cause Analysis (BharatLink Freight) | *Python, statistics, Power BI* GitHub

- Cleaned 3,582 GPS-tracked FTL bookings (mixed dates, 350+ messy locations, PII) to explain a 38.6% OTIF.
- Showed through SLA feasibility tests and lane benchmarks that the flat 100-hour ETA made 0% of trips over 1,200 km feasible; tested drivers with χ^2 and Cramér's V and flagged GPS anomalies.
- Designed a 4-rule early-warning score (72% precision, 82% recall out-of-time) and a Power BI report with 27 DAX measures; with carrier re-tendering, the plan targets about +11.8 pp OTIF.

E-Commerce Cohort, Retention & Profitability Analysis | *Python, pandas, pytest, GitHub Actions* GitHub

- Built a tested Python package for cohort and retention analysis of 51,290 order lines from 17,415 customers.
- Found that 2023 sales rose 24% while profit fell 12% as margin dropped from 18.0% to 12.8% in every category, pointing to a company-wide cost or pricing change rather than discounts or mix.
- Showed that repeat buyers (31% of customers) generate 56% of profit and that discounts above 20% lost $288.6K; delivered an Excel report and an executive deck.

ProtoSetFit: Few-Shot Text Classification (team of 3) | *PyTorch, Hugging Face* GitHub

- Ran a controlled 2×2 SetFit ablation on 8-shot emotion classification (5 seeds, 25 runs, 20-run λ sweep).
- Hard-negative mining: 51.94% vs 51.08% for SetFit on a frozen test set; not significant at N=5 (Holm-corrected).

Improving FastFit for Few-Shot Intent Classification (in progress) | *PyTorch, statistics* Portfolio

- Reproducing FastFit (NAACL 2024) on 77-class BANKING77, 5-shot, with controlled optimizer and projection tests.

RESEARCH

Lifecycle Trajectories of First-Time and Subsequent Technology Convergence: Evidence from USPTO Utility Patents, 1976–2025

Accepted, 2026 · 2026 CSMOT Annual Conference, National Cheng Kung University · with Prof. Chih-Hung Hsieh Portfolio

- Modelled first-time and subsequent convergence as pair-level trajectories across 134.6M backward-citation links.
- Holdout MAPE of 0.259% (first-time) and 0.833% (subsequent); 73.04% of observed IPC4 pairs reactivated by 2025.

Tracing Technology Convergence Through Patent Analysis: Longitudinal Evidence from USPTO Patents, 1976–2025

Thesis, 2026 · Global MBA thesis, Yuan Ze University Portfolio

- Built 21.9M patent–technology pair events from 8.5M patents, citations and IPC subclasses with Python and DuckDB.
- Fitted Gompertz, logistic and exponential models on 1976–2019; Gompertz won on the 2020–2025 holdout.

CERTIFICATIONS

Languages: TOEIC Listening & Reading 840/990 (Oct 2024) · TOCFL Level 2, CEFR A2 (Jul 2026)
HackerRank: SQL (Advanced) · SQL (Intermediate) (Jun 2026)
DataCamp (12 courses, 2026): Power BI · DAX · SQL (4) · Python and pandas (4) · Statistics in Python · Cleaning Data with GenAI
Coursera (2025): Supply Chain Analytics Essentials (Rutgers) · Supply Chain Planning (UC Irvine) · Supply Chain Management and Analytics, Using Data Analytics in Supply Chain (Unilever) · Excel Basics for Data Analysis (IBM)
Verify all 22 certificates on the portfolio

ACTIVITIES

Volunteer blood donor: Thu Duc City Red Cross Society, 2022 – present (7 donations); help staff run collection drives.
Industry learning: Lazada hub and Cai Mep port visits (2022); ULSC workshops on fumigation and reverse logistics.
